

“DEFENDER”

BLACK MINERAL CAP SHEET

Feature and Benefits

- Torch-on application
- Can be used on both flat and sloping roofs
- Ideal for new and existing roofs
- Excellent dimensional stability
- Provides high temperature performance
- Resistant to damage and marking during application
- 10 year materials guarantee

KBP are proud to launch our “DEFENDER” cap sheet mineral felt. Defender torch-on cap sheet consists of a polyester carrier coated with polymer modified bitumen. The upper surface is finished with black mineral granules and the lower surface has a sacrificial film which rapidly melts during the torching process. A 75mm sacrificial film selvedge facilitates bonding of side laps.
