

# **THAUMAFIX FLEXIBLE COATINGS**

## **THAUMAFIX PRC**

The ideal cold applied weather proofing solution. A flexible fibre and butyl rubber reinforced bitumen coating, which does not sag or flow. It provides a seamless coating to flat or pitched roofs, such as slate, concrete, cast iron, aluminium, lead, zinc, corrugated iron, roofing felt, timber, etc.

Weather and waterproof – impervious to rain, sleet or snow.

Strong and Flexible – resistant to extremes of temperature.

Can be used on damp surfaces.

Available in 5kg or 25kg.

## **THAUMAFIX R**

A trowel on roof patching compound to give fast, permanent roof repairs under all weather conditions – even during heavy rain.

Easy one step operation with a trowel.

Seals instantly – cures completely in 2 to 3 days.

Remains flexible for years.

Available in 3kg tins.
